

Formal Short Division with a Four Digit Dividend

$$1435 \div 6 =$$

Known as the 'bus stop' method.

Draw a bus stop.

Record the dividend inside the bus stop.

Record the divisor on the left outside the bus stop.

$$6 \overline{) 1435}$$

$$\begin{array}{r} 239 \\ 6 \overline{) 1435} \\ \underline{25} \end{array}$$

Record the quotient above the bus stop with a remainder.
