

Halving of 2 Digit numbers by Partitioning

$$\frac{1}{2} \text{ of } 38 =$$

Halve the tens, then halve the ones. Add the halved tens and ones together.

Record the total in the number sentence.

$$\frac{1}{2} \text{ of } 38 = 19$$

Remember half can be written as $\div 2$

$$38 \div 2 = 19$$

You could use Numicon or Dienes rods and cubes to support your learning.
