

Addition of a 3 Digit Number to a 3 Digit Number using Vertical
Expanded Columnar Addition

$$247 + 125 =$$

Record the larger number first and the smaller number beneath it.

Add the ones together and record the total below the line, then add the tens followed by adding the hundreds.

Add the hundreds, tens and ones together to find the grand total.

$$\begin{array}{r} 247 \\ +125 \\ \hline 12 \\ 60 \\ 300 \\ \hline 372 \end{array}$$
